

Specification Sheet

CV 36/2 & CV 46/2

Upright Vacuum Cleaners for efficient and thorough deep down cleaning.

Kärcher's upright vacuum cleaners combine their high suction power with a direct motor driven brush. Stubborn dirt particles, threads and hairs are dislodged from the carpet with ease whilst freshening up the carpet pile at the same time. Equipped with a wide, low profile brush head, these units are great at cleaning right up to the edges and can operate completely flat for cleaning under furniture and beds.

- Ergonomically designed height adjustable handle aids operator comfort.
- Soft or hard brush strips can be changed without the need for tools.
- Ideal for cleaning under objects e.g beds and furniture due to its lay flat facility.
- Adjustable brush function allows you to alter the brush height to suit all types of flooring.
- Optimum filtration due to its triple filtration system (paper filter bag, motor protection filter & exhaust filter).
- Equipped with a detachable suction tube for various cleaning applications.
- An electronic indicator shows you when the brush is set to the ideal height.
- If brush becomes blocked the electronic control switches off the unit.
